

## Jeans

In the past fifty years, jeans have become a fashion staple. A Lady pays special attention to the style of jean, and sees jeans as an investment. If she buys wisely, she can wear the same pair of jeans for several years. Importantly, she should not buy too trendy. Instead, she should find the moderate style, and then make sure they fit her body type well. A Lady knows that the fit is more important style. However, cheap jeans or out of style jeans will make the Lady look out of fashion. The right pair of jeans communicate knowledge and leadership.
